

Keep Them Out Of The Way— Not Out Of Reach!

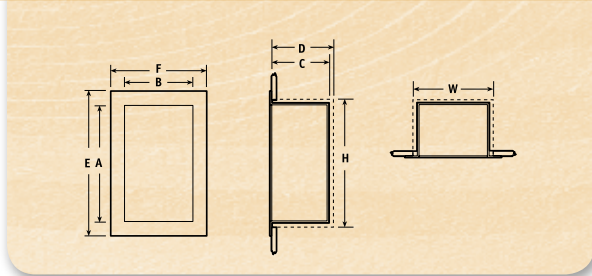

AMBASSADOR SERIES

When your customers call for fire extinguishers that are safely out of the way, but always handy in an emergency, show them the **Ambassador Series Cabinets**. These sturdy steel cabinets, manufactured by **J.L. Industries**, have an electrostatic white epoxy finish, continuous hinge door, double-strength door glass and a 1¼" face width on the trim and door. **Ambassador Cabinets** come in surface mount, fully recessed (flat) and semi-recessed (1½" or 3" trim) models. The 3" trim model has rolled edge construction, the others are square edged. Glass doors have standard door hardware (zinc-plated pull handle and roller catch).

NOTE: Add wall material thickness to wall depth when determining cabinet size (for example, a standard 2" x 4" stud wall with ½" sheetrock would equal a 4" wall depth).
